WeighRite

Software & Hardware Weighing System with a Wireless Remote

WeighRite is designed to act as a shipping and receiving attendant, tracking the deliveries and sales to and from your business. With the use of a truck scale system and WeighRite the sale of Milk, Feed and Cattle along with the purchase of Feed and Cattle can be accurately accounted for and tracked.

Passport is a small truck mount unit that can store information such as Driver's Name, Vendor, Hauler, Contract #, PO#, Ingredient, and other important transaction information that then is passed wirelessly to the WeighRite system when it arrives on farm.
